

Curriculum Vitae for David L Alumbaugh

Employment History

- 2019 - Present Staff Scientist, Lawrence Berkeley National Laboratory, Berkeley, CA.
Principle responsibilities include:
- leadership of LBNL's Carbon Storage and Hydrocarbon Science Programs;
 - investigating new methodologies and configurations of measuring electromagnetic fields for subsurface geophysical characterization;
 - investigating unique applications of geophysical methods for monitoring subsurface fluid and gas injection processes in CO₂ storage and geothermal energy production scenarios;
 - guiding the development of, and using numerical modeling and both physics-driven and machine learning methodologies for geophysical data analysis, subsurface imaging, and interpretation.
- 2018 - Present Consultant and Principal, BlueGreen Geophysics, Berkeley, CA.
Services provided to clients include:
- basic electromagnetic data quality assessment analysis;
 - electromagnetic survey design and resolution analysis;
 - one, two and three-dimensional forward and inverse modeling of EM geophysical data, including marine and land MT and CSEM data, as well as various types of airborne EM data;
 - development and execution of novel workflows for inverting and interpreting electromagnetic geophysical data.
- 2013 – 2018 Principal Geoscientist and Electromagnetics Subject Matter Expert, NEOS GeoSolutions, Pleasanton, CA. Principle responsibilities included:
- developing and managing the future vision and path forward for multi-physics geophysical data interpretation solutions using both model driven physics-based techniques as well as data driven machine learning methodologies;
 - performing technical due diligence for possible technology acquisitions and partnerships;
 - managing survey design, data processing, imaging, and interpretation for all electromagnetic data acquisition projects, and developing the workflows for the interpretation of electromagnetic geophysical data;
 - scoping out software and data acquisition requirements for future projects.
- 2011 – 2013 Senior Geophysical Researcher, Geophysical Modeling and Inversion R&D Group, Earth Sciences Division, Chevron Energy Technology Company, San Ramon, CA. Principle responsibilities included:
- developing workflows for the interpretation of electromagnetic geophysical data as applied to resource exploration and reservoir management;
 - testing various 2D and 3D EM numerical modeling and inversion algorithms, and providing code modifications as required;

- technical guidance for various Chevron 'think-tank' R&D projects;
 - simulating geophysical responses to transient physical property changes in realistic multi-phase flow reservoir models and simple hydrofrac simulations.
- 2004 – 2011 Discipline Manager of the Physics, Modeling and Inversion Group, Schlumberger EMI Technology Center, Berkeley, CA. Principle responsibilities included:
- managing the development and commercialization of the modeling, processing, and data interpretation console for Schlumberger's 'DeepLook-EM' cross-well electromagnetic imaging system;
 - managing research, modeling, and theoretical projects associated with the development of an intellectual property portfolio for Schlumberger's marine electromagnetic exploration business;
 - participating in various due-diligence research exercises for small business acquisitions or investments, and technology infringement lawsuits.
- 1999 – 2005 Assistant/Associate Professor, University of Wisconsin-Madison, Department of Civil and Environmental Engineering, Geological Engineering Program. Principle responsibilities included:
- teaching courses in applied geophysical methods and applications;
 - performing and managing research related to
 - oil field reservoir characterization;
 - methods to map contaminants and remediation in the subsurface;
 - hydrologic assessment;
 - non-destructive evaluation of engineered structures;
 - the possible existence and effects of power grid 'stray' electric current contamination on dairy cow health and milk production.
- 1993 – 1999 Post-Doc / Senior Member of the Technical Staff, Geophysical Technology Department, Sandia National Laboratories, NM. Principle responsibilities included:
- developed and testing 3D finite difference forward modeling and inverse algorithms for interpreting electromagnetic geophysical data using parallel computing platforms;
 - applied 3D electromagnetic forward modeling and inverse solutions to better understand the physics of EM geophysical methods, as well as designing novel acquisition technologies;
 - managing the development, implementation, and operation of an experimental hydrologic test site and the associated research projects aimed at better understanding flow and contaminant transport properties in the unsaturated zone.

Adjunct/Visiting Professorships

- 2018 – Present Adjunct Senior Research Scientist, Columbia University, Lamont-Doherty Earth Observatory.

2006 – 2014 Adjunct Associate Professor, University of California Berkeley, Department of Earth and Planetary Sciences and Berkeley Seismological Laboratory.
2003 – 2004 Visiting Associate Professor, Stanford University, Department of Geophysics.
1997 – 1999 Adjunct Professor, New Mexico Tech, Department of Earth and Environmental Science.

Formal Education

Ph.D., 1993, Materials Science and Mineral Engineering, emphasis in Geophysical Engineering, University of California at Berkeley.
M.S., 1989, Materials Science and Mineral Engineering, emphasis in Geophysical Engineering, University of California at Berkeley.
B.S., 1986, Geological Sciences, San Diego State University.

Significant Honors and Awards

Hart Energy E&P Magazine, Meritorious Award for New Engineering Innovation, 2010, Presented to Schlumberger for The DeepLook-EM Enhanced Crosswell Reservoir Monitoring System.
Recipient, The Gerald W. Hohmann Award for Excellence in Applied Electrical Geophysics, The Gerald W. Hohmann Memorial Trust, September, 1998.
Best Student Paper Award, Society of Exploration Geophysicists, 1992.
Outstanding Graduate, San Diego State University Geological Sciences Department, 1986.

Professional Memberships:

Society of Exploration Geophysicists (SEG)
European Association of Geoscientists and Engineers (EAGE)
American Geophysical Union (AGU)
Bay Area geophysical Society (BAGS)

Professional Service

Society and Committee Leadership

Member of the Society of exploration Geophysicists Distinguished Lecturer Committee, 2021-present.
Member of the Incorporated Research Institutions for Seismology (IRIS) Electromagnetic Advisory Committee (EMAC), 2018-2021.
Member of the QuakeFinder Research Advisory Council, November 2017-2020.
President, Bay Area Geophysical Society (BAGS), December 2014 to December 2016.
Member of the Non-Seismic Technical Committee for the SEG's 'SEAM' modeling project, 2008.
Member of the Society of exploration Geophysicists Online Education Taskforce, 2007.
Member of SAFOD Downhole Measurements Technical Panel, 2004.
Member of the Electromagnetic Sounding of the Continents (EMSOC) Steering Committee, 2003-2005.
Co-chair, Environmental and Engineering Geophysical Society Research Committee, 1996-1998.

Conferences

Organization

- Technical Program Chair, The Society of Exploration Geophysicists Exposition and 87th Annual Meeting, Anaheim, California, October 2018.
- Symposium Organizer and Co-Chair, 3DEM-6, The Gerald W. Hohmann Memorial Trust, Berkeley, CA, March 2017.
- Electromagnetic Methods sessions organizer for the 2016 Society of Exploration Geophysicists Annual Meeting, Dallas, TX.
- Technical Program Co-organizer, 3DEM-5, The Gerald W. Hohmann Memorial Trust, Japan, May 2013.
- Electromagnetic Methods sessions organizer for the 2013 Society of Exploration Geophysicists Annual Meeting, Houston, TX.
- Electromagnetic Methods sessions organizer for the 2012 Society of Exploration Geophysicists Annual Meeting, Las Vegas, NV.
- Co-chair, Technical Program for SAGEEP'99, March, 1999.
- Co-organizer, four sessions and the Research and New Technologies Discussion Panel, SAGEEP'98, March, 1998
- Co-organizer, the Research and New Technologies Sessions and Discussion Panel, SAGEEP'97, March, 1997.
- Co-organizer, The Role of In-Mine Geophysics for Resource Evaluation Workshop, 66'th Annual Meeting of the SEG, November, 1996.
- Co-chair, TEM and Other Applications, 79th Annual Meeting of the SEG, November, 2009.
- Co-chair, EM modeling and Inversion, 78th Annual Meeting of the SEG, October, 2008.

Co-chair for various sessions at meetings

- Co-chair, TEM and Other Applications, 79th Annual Meeting of the SEG, November, 2009
- Co-chair, EM modeling and Inversion, 78th Annual Meeting of the SEG, October, 2008
- Co-chair, CSEM Theory, 77th Annual Meeting of the SEG, September, 2007
- Co-chair, EM and Electro-seismic Acquisition and Applications, 75th Annual Meeting of the SEG, October, 2005.
- Co-chair, New developments in 3D EM Inversion Technical Session, 72nd Annual Meeting of the SEG, October, 2002.
- Co-chair, Electromagnetics - 3D and Inversion Technical Session, 70'th Annual Meeting of the SEG, August, 2000.
- Co-chair, Resistivity and Related Techniques Session, 64'th Annual Meeting of the SEG, November, 1994.
- Co-chair, Modeling and Inversion Session, John S. Sumner Memorial International Workshop on Induced Polarization in Mining and the Environment, October 1999

Editorships

- Associate Editor, *Geophysics*, 1997-1999.
- Special Editor, *Geophysics*, 1993-1997.

Books Edited

Volume editor, 'The Boundary Element Method in Geophysics' by Xu Shi-zhe, Society of Exploration Geophysicists, 2001.

Granted Patents

- Patent Number US 9268052 B2, Method and system of using a data weighted electromagnetic source for time-lapse monitoring of a reservoir production or hydraulic fracturing; Inventors - Hoversten, G. M., Brow, V. C., and Alumbaugh, D. L., Granted February 23, 2016.
- Patent Number US 8614578 B2, Attenuation of electromagnetic signals passing through conductive material; Inventors - Gao, G., Morrison, H. F., Zhang, H., Rosthal, R. A., Alumbaugh, D., and Levesque, C., Granted December 24, 2013.
- Patent Number US 8332191 B2, Correction factors for electromagnetic measurements made through conductive material; Inventors - Rosthal, R. A., Zhang, H., Levesque, C., Gao, G., Morrison, H. F., and Alumbaugh, D. L., Granted December 11, 2012.
- Patent Number US 8115491 B2, Providing a tow cable having plural electromagnetic receivers and one or more electromagnetic sources; Inventors - Alumbaugh, D. L., Gao, G., Habashy, T. M., Morrison, H. F., Oristaglio, M., Safinya, K., and Zerilli, A., Granted February 14, 2012.
- Patent Number US 8010291 B2, Surveying Processing measurement data that involves computing a derivative of the measurement data that represents a subterranean structure; Inventors - Chen, J., Alumbaugh, D. L., Nichols, E., Horne, S. A., and Eyl, K, Granted August 30, 2011.
- Patent Number US 8008921 B2, Surveying using vertical electromagnetic sources that are towed along with survey receivers; Inventors - Alumbaugh, D. L., Zerrilli, A., Morrison, H. F., Howlid, M., Brady, J. P., Combee, L., Nichols, E., and Cuevas, N., Granted August 30, 2011.

- Patent Number US 7949470 B2, Processing measurement data in a deepwater application; Inventors - Alumbaugh, D. L., Chen, J., Eyl, K., Horne, S. A., and Nichols, E., Granted May 24, 2011.
- Patent Number US 7884612 B2, Multi-component sources for subsea exploration; Inventors - Conti, U., Zerrilli, A., Alumbaugh, D. L., Howlid, M., Combee, L., and Eyl, K., Granted February 8, 2011.
- Patent Number US 7659724 B2, Surveying method using an arrangement of plural signal sources; Inventors - Alumbaugh, D. L., Chen, J., Eyl, K., Horne, S. A., and Nichols, E., Granted February 9, 2010.
- Patent Number US 7657391 B2, Electromagnetically Detecting Thin Resistive Bodies in Shallow Water and Terrestrial Environments; Inventors - Alumbaugh, D., Chen, J., Morrison, H. F., Granted February 2, 2010.
- Patent Number US 7640110 B2, Pixel based inversion method for surface electromagnetic measurements; Inventors - Abubakar, A., Habashy, T. M., Druskin, V., and Alumbaugh, D. L., Granted December 29, 2009.
- Patent Number US 7565244 B2, Method and system for removing effects of conductive casings and wellbore and surface heterogeneity in electromagnetic imaging surveys, ; Inventors - Alumbaugh, D., Zhang, P., Nichols, E., Morrison, F., Abubakar, A., and Habashy, T., Granted July 21, 2009.
- Patent number US 7471089 B2, Electrode array for marine electric and magnetic field measurements having first and second sets of electrodes connected to respective first and second cables; Inventors - Zerrilli, A., Conti, U., and Alumbaugh, D., Granted December 30, 2008.
- Patent number US 7400977B2, Computing values for surveying a subterranean structure based on measurements according to different electromagnetic survey techniques; Inventors - Alumbaugh, D., Chen, J., and Morrison, H. F., Granted July 15, 2008.
